SKF – the knowledge engineering company

From one simple but inspired solution to a misalignment problem in a textile mill in Sweden, and fifteen employees in 1907, SKF has grown to become a global industrial knowledge leader.

Over the years, we have built on our expertise in bearings, extending it to seals, mechatronics, services and lubrication systems. Our knowledge network includes 46 000 employees, 15 000 distributor partners, offices in more than 130 countries, and a growing number of SKF Solution Factory sites around the world.

Research and development

We have hands-on experience in over forty industries based on our employees' knowledge of real life conditions. In addition, our world-leading experts and university partners pioneer advanced theoretical research and development in areas including tribology, condition monitoring, asset management and bearing life theory. Our ongoing commitment to research and development helps us keep our customers at the forefront of their industries.

Meeting the toughest challenges

Our network of knowledge and experience, along with our understanding of how our core technologies can be combined, helps us create innovative solutions that meet the toughest of challenges. We work closely with our customers throughout the asset life cycle, helping them to profitably and responsibly grow their businesses.

Working for a sustainable future

Since 2005, SKF has worked to reduce the negative environmental impact from our operations and those of our suppliers. Our continuing technology development resulted in the introduction of the SKF BeyondZero portfolio of products and services which improve efficiency and reduce energy losses, as well as enable new technologies harnessing wind, solar and ocean power. This combined approach helps reduce the environmental impact both in our operations and our customers' operations.

SKF Solution Factory makes SKF knowledge and manufacturing expertise available locally to provide unique solutions and services to our customers.

Working with SKF IT and logistics systems and application experts, SKF Authorized Distributors deliver a valuable mix of product and application knowledge to customers worldwide.

Our knowledge – your success

SKF Life Cycle Management is how we combine our technology platforms and advanced services, and apply them at each stage of the asset life cycle, to help our customers to be more successful, sustainable and profitable.

Working closely with you

Our objective is to help our customers improve productivity, minimize maintenance, achieve higher energy and resource efficiency, and optimize designs for long service life and reliability.

Innovative solutions

Whether the application is linear or rotary or a combination, SKF engineers can work with you at each stage of the asset life cycle to improve machine performance by looking at the entire application. This approach doesn't just focus on individual components like bearings or seals. It looks at the whole application to see how each component interacts with each other.

Design optimization and verification

SKF can work with you to optimize current or new designs with proprietary 3-D modelling software that can also be used as a virtual test rig to confirm the integrity of the design.

Bearings

SKF is the world leader in the design, development and manufacture of high performance rolling bearings, plain bearings, bearing units and housings.

Machinery maintenance

Condition monitoring technologies and maintenance services from SKF can help minimize unplanned downtime, improve operational efficiency and reduce maintenance costs.

Sealing solutions

SKF offers standard seals and custom engineered sealing solutions to increase uptime, improve machine reliability, reduce friction and power losses, and extend lubricant life.

Mechatronics

SKF fly-by-wire systems for aircraft and drive-by-wire systems for off-road, agricultural and forklift applications replace heavy, grease or oil consuming mechanical and hydraulic systems.

Lubrication solutions

From specialized lubricants to state-of-the-art lubrication systems and lubrication management services, lubrication solutions from SKF can help to reduce lubrication related downtime and lubricant consumption.

Actuation and motion control

With a wide assortment of products – from actuators and ball screws to profile rail guides – SKF can work with you to solve your most pressing linear system challenges.

Foreword

Power transmission products play an important role in overall bearing performance and are the vital link between moving parts in equipment. By creating its own range of power transmission products, SKF can offer products that are well-matched and give engineers a wide design choice according to performance and cost considerations.

Bringing power transmission products under a single brand offers significant user benefits apart from the confidence that comes from using a well-known brand. SKF can provide a convenient single supply source for products and services with a large number of items in stock. This, in turn, offers the chance to simplify logistics to end users and reduce administrative work.

As bearings and other power transmission components work together in products used in many industries, many bearing problems and failures can be identified through the knowledge of power transmission. Examples of those industries are food and beverage, oil and gas, pulp and paper, textile, metalworking, packaging, mining, mineral processing and cement, agriculture and material handling. Combining an understanding of bearing systems with power transmission gives SKF the opportunity to enhance the support available to users.

All SKF Power Transmission products are identified by an SKF specific designation prefix. Apart from that, the designation follows international standards for easy recognition and cross-referencing. The SKF Power Transmission range covers most common types of products, which can be divided into six main categories - belts, pulleys, chains, sprockets, couplings as well as bushings and hubs.

About the data in this catalogue

The data in this catalogue relates to SKF's state-of-the-art technology as of mid-2015. This data may differ from that shown in earlier catalogues because of revised methods of calculation, redesign or technological developments.

SKF reserves the right to make continuing improvements to SKF products with respect to materials, design and manufacturing methods, as well as changes necessitated by technological developments.

Other Power Transmission catalogues

Product information is also available via the SKF Power Transmission products website at www.skfptp.com. The website not only provides product information, but also online calculation tools, drawings, and search and selection functions.

The main printed SKF Power Transmission catalogues are:

- SKF Transmission chain catalogue
- SKF Couplings catalogue
- SKF FX Keyless Bushings catalogue
- SKF Xtra Power Belts catalogue
- SKF Conveyor Chain catalogue

For more information about SKF Power Transmission products, contact your local SKF representative or SKF Authorized Distributor.

SKF XP Lawn and Garden belts

A new, full range of SKF XP Lawn and Garden v-belts for those extra tough applications are now available.

Aramid corded lawn, garden and grounds keeper power equipment belts are extremely durable due to their high strength construction. Aramid is used in these belts as the tension member due to its inherent length stability and high tensile strength.

Lawn and garden equipment belts use friction and a clutching action rather than being powered by gears. Standard polyester cord will stretch and become loose over time. SKF belts that are constructed from aramid cord also have a special dry cotton wrap which provides for a consistent power transmission and reduced slippage whilst clutching, high resistance to repeated reverse flexing and high resistance to oil, heat and cracking. An ideal belt for all lawn, garden and grounds keeping equipment.

Aramid constructed belts are specifically used on applications where high levels of power transmission and long service life are required, where there are restrictions on the drive width and/or the drive is critical. This includes tillers, ride-on mowers, commercial lawn mowers and chippers/shredders, tillers and compost equipment. This equipment is commonly used by municipalities, golf courses, parks, farms and larger homes.

SKF XP Lawn and Garden belt range nominal dimensions

Product fulfillment

By developing its own range of solutions for power transmission, SKF is able to offer well-matched products thus giving engineers a wide choice for better performance at an optimal cost.

Belts

- Oil and heat resistance/anti-static properties (except SKF Cogged Raw Edge Belts).
- Globally sourced rubber along with stringently controlled tension members provide the superior performance expected from SKF.
- State-of-the-art electronic rubber blending/mixing processes maintain superior quality.
- Tight tolerance stability during the manufacturing process along with superior raw material eliminates the requirement to match individual belts to a single drive.

Pulleys

- Pulleys are all statically balanced to provide true running tolerances at higher speeds.
- Dynamic balancing is also available on request.
- Pulleys, with an outside diameter equal to or less than 300 mm are boxed. Pulleys with an outside diameter greater than 300 mm or over 30 kg are placed on a wooden pallet.

Dacrotized	Suitable for corrosive conditions.
Nickel-plated	Improved wear resistance. Recommended for outdoor conditions, such as exposure to rain.
Zinc-plated	A cost-effective way to increase corrosion resistance.
Stainless steel	Used in food processing applications, high/low temperature conditions (–20 to 400 °C/ –4 to 752 °F) and in corrosive environments.

Chains

- From the raw material to the finished product, our chains are superior by design: 100 % pre-stressing, 100 % pre-loading and running prior to packaging.
- SKF uses a heavy pre-lubrication process to enable optimum storage life; all SKF Chains are fully wrapped in plastic prior to being boxed.
- A very large range of plating material is available: Dacromet, nickel, zinc and stainless steel.
- SKF also supplies a full range of conveyor chains for every application.

Sprockets

- All sprockets are oiled, bagged, sealed and then boxed. This allows the product to reach the customer in perfect condition every time.
- Sprockets are also available with hardened teeth, bored and keyed to size.
- Sprockets with an outside diameter equal to or less than 300 mm are boxed. Sprockets with an outside diameter greater than 300 mm or over 30 kg are placed on a wooden pallet.

Couplings

- SKF Flex, Jaw, Chain, Gear, Grid FRC, Rigid Couplings, and Universal Joints: no matter which coupling your application requires, SKF offers options for bushings, bored to size or simply piloted.
- All couplings are boxed or bagged for protection; larger units are on a wooden pallet for easy handling and safety.

Bushings

- Bushings are available in many variants: Taper bushings, QD bushings, FX Keyless bushings, weld-on hubs and bolt-on hubs. They are made from high quality steel and most types are phosphate coated or blackened for improved corrosion resistance.
- All bushings are designed for quick and easy installation and removal with basic tools, resulting in minimum downtime each time they are fitted.
